(b) if so, the details thereof received by Government;

(c) how much water level of the ocean has increased during the last 10 years, year-wise;

(d) how far Indian coast shall be adversely affected as a result of such increase of water-level; and

(e) the steps being taken/taken by Government for the protection/safety of India?

THE MINISTER OF EARTH SCIENCES (SHRI KAPIL SIBAL): (a) Yes, Sir.

(b) The information available in published reports indicate that the sea surface temperatures (SST) and the upper ocean heat content in the Arctic Ocean have been steadily increasing. Few climate stations that have records extending back beyond 50 years, indicate that the Arctic region warmed up by about 1-2°C between 1910 and 1945. A number of stations showed further warming over the past two decades. The SST recorded in 2007, is reported to have been about 3.5°C warmer than the 100 year average.

(c) The average volume of Arctic Ice is 20,000 Km^3, compared to the Antarctic Ice volume (30,000,000 Km^3). Since the quantity of ice in Arctic is very small compared to Antarctic, Arctic sea ice melting does not increase the water level of the oceans significantly.

(d) Since melting of the ice cover on the Arctic Ocean does not affect sea level significantly, the coastal areas will not be adversely affected.

(e) Government has set up a network of about 50 tidal gauges all along Indian coast line for continuous monitoring of sea level. Besides, Coastal Zone vulnerability zonation maps are being generated for various sectors along the Indian Coast.

Custodial rapes

†1281. SHRI AJAY MAROO: Will the Minister of HOME AFFAIRS be pleased to state:

(a) the year-wise number of cases of custodial rapes registered during the last three years;
